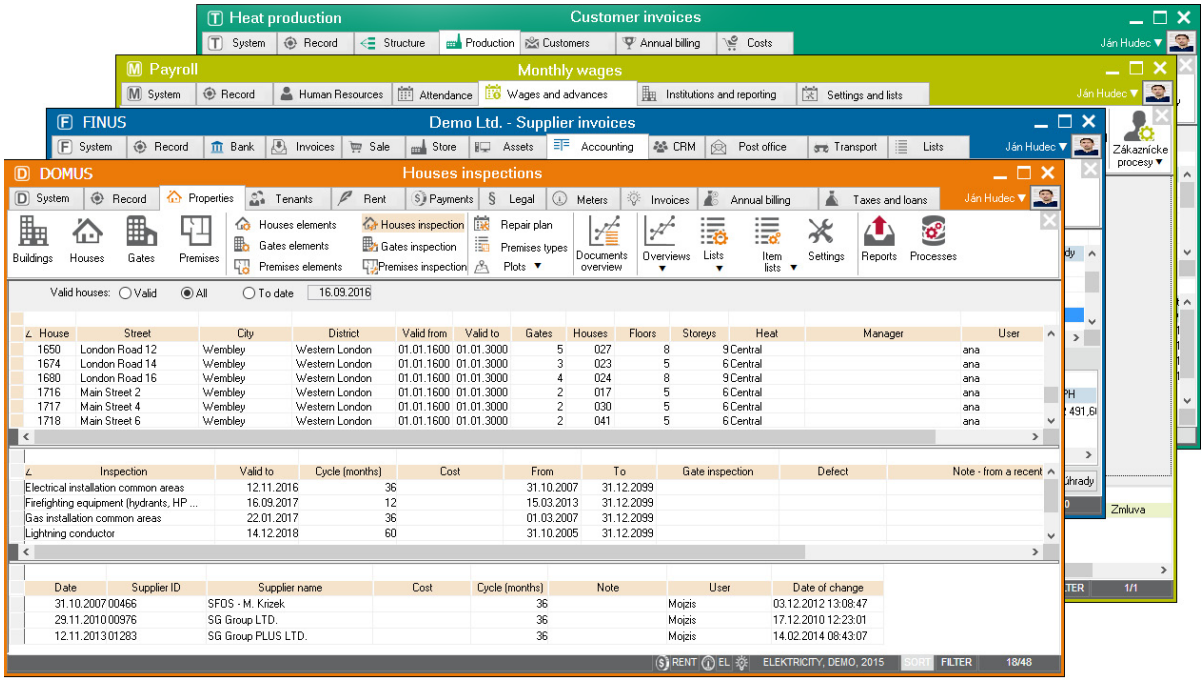
DOMUS

ANASOFT

Property management



THE DOMUS SYSTEM

The DOMUS system is a comprehensive solution for managing residential and non-residential properties and heat production.

It is used to administer properties, inspections and property users, monitor payments, take meter readings and features supports for annual billing.

Finus module is a comprehensive financial system supporting double-entry accounting with support for invoicing, sales, inventory, property records, CRM, bank accounts, cash registers and transport.

Modul Heat Production monitors costs, meter readings and usage data from these readings, generates invoices and monitors technical production equipment.

250 companies manage in DOMUS more than 750 000 units

WEB PORTAL

Users have access to the following:

- Individual flat account
- Graphs of usage
- Annual billing
- Building expenses
